

Features:

- ★ Removable core type elements (can be removed without draining the tank)
- ★ Weatherproof terminal box

FP/CP and FP/CPT Series Removable Core Type Flameproof Oil Immersion Heaters

Application: This range of removable core type immersion heaters is designed for use in fuel oil, and lubricating oils. Particularly recommended for use in equipment which cannot easily be drained. Also suitable for heating other liquids which are non corrosive to the mild steel sheath or non-ferrous glands.

Specification:

- ★ To BS5501 Part 1 and 5 1977 EN50 014 and EN50 018
- ★ Suitable for gas groups 11A and 11B
- ★ Temperature classification T4 to T6 (varies with liquid working temperatures)
- ★ BASEEFA approved
- ★ Standard range from 1 to 8 kW
- ★ Working pressures to 10 Bar
- ★ IP65 terminal box
- ★ Screwed 2" BSP (Non automatic), 2½" BSP (Automatic)
- ★ Plain mild steel element sheath
- ★ Watts density complies with BS799 Part 5 1975
- ★ Suitable for electrical supplies 10V - 660V (within design limitations)
- ★ Available for single phase, three phase (3 or 4 wire) AC and DC supplies
