

Immersion Heater Batteries Oil

BHE Series Electric Oil Immersion Heater Group.

Application: This range of multiple tube immersion heaters is primarily designed for maintaining oil temperatures in industrial fuel oil storage tanks when no steam supply is available. They are suitable for heating other non-corrosive liquids.

Features:

- ★ Removable core type elements (can be removed without draining tanks)

Specification:

- ★ Standard range from 6 to 180kW
- ★ Working temperatures up to 150°C
- ★ Working pressures up to 10 Bar
- ★ IP55 terminal box
- ★ Complete with control thermostat and master thermostat.
- ★ Electrical stage control
- ★ Watts density complies with BS799 part 5 1975
- ★ Suitable for electrical supplies of 220V, 230/250V, 380V, 400/440V and up to 550V A.C.
- ★ Available for single phase, three phase (3 or 4 wire) A.C. and for D.C. supplies.
- ★ All welded mild steel construction
